

ENVIRONMENTALLY FRIENDLY

Increases Energy Savings.

Research indicates that an un-insulated basement can account for over 33% of the total heat loss in your new home. That's why our foundations feature a continuous layer of insulation bonded directly to the concrete shell, resulting in high energy efficiency - and helping to reduce energy costs.

*Ask about the Manufacturer's Limited Warranty.

Building with Superior Walls insulated precast concrete wall panels provides your home with a superior "thermal envelope," minimizing the potential for energy leakage. The combination of pre-engineered built-in insulation and high strength concrete creates a superior foundation for energy conservation.

Provides *The Superior Advantage.*™

Only Superior Walls offers all these green-building advantages:

- · Supports green, sustainable construction
- · Continuous insulation layer reduces thermal bridging
- · Helps meet building envelope thermal requirements
- · Precast assemblies optimize material usage
- Reduces on-site waste
- · Reduces construction time

HOME BUILDERS ARE TALKING

"Innovative, revolutionary, environmentally friendly, green..."

"Not only did we find that it was innovative, it was a great product. It also provided us with a much quicker timeframe in building our home."

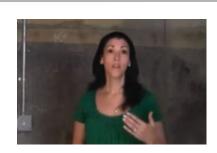

- Bernie Iacovangelo, Faber Homes

"Living with our Superior Walls has been a worry free experience."

"We often get asked the question: Are there things that you would do differently if you had to do it again? Certainly one that I would never change would be my use of Superior Walls and that's why I'm a lifelong Superior Walls customer."

- Mark Leder, Building Professional

"Thanks to Superior Walls we just don't have to worry."

"We literally saved thousands of dollars by buying a house that already had Superior Walls. When we decided we were going to stay in this house and build an addition we knew that Superior Walls were the only way to go."

- Jessica Hawk Ippolito, Homeowner

Superior Design

merica's finest new homes are built on Superior Walls foundations. Maybe it's because we're the world leader in precision foundation design and engineering. Maybe it's because our highstrength precast concrete foundation systems are created in a factory-controlled environment with built-in

insulation. Or maybe, like you, our homeowners prefer stronger, warmer, drier, greener basements – with foundations typically installed in one day.

Today's smart home buyers care about creating comfortable lifestyles. Our products create comfortable living space —"The Best Room In The House" — while lowering energy costs.
That's why Superior Walls are in demand as the superior foundation for new custom homes. Discover why Superior Walls systems are renowned for durability while creating added value for new homes.

For video showing actual installation, simply visit: www.SuperiorWalls.com

Superior Home Plans www.SuperiorWalls.com

Superior Engineering

uperior Walls has been the world leader in custom residential precast concrete foundation systems since 1981. That's because building on a Superior Walls foundation provides architects, builders, and new home buyers with warm, dry added living space.

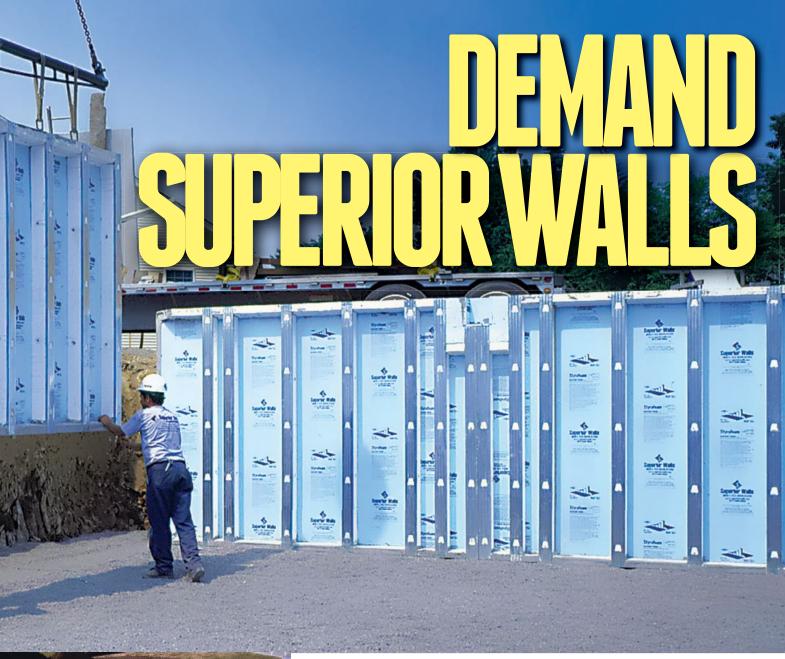

Discover what building professionals and consumers are saying about building and living with Superior Walls: "...the highest quality...the most advanced...the strongest materials...precision design...the most efficient foundation on earth...the warmest and driest foundation...the most green...the Superior Advantage...!"

Build with all the advantages of this sensible, durable, and environmentally sustainable foundation system.

Stronger. Warmer. Drier. Greener. Smarter. Simply Superior!

For video showing actual installation, simply visit: www.SuperiorWalls.com

Superior Value

Build More Living Space – For Less.

A Superior Walls foundation can increase useable home living space by as much as 50% (depending on the home's style and architecture) – adding potential resale value.

Featuring our patented technologies and superior manufacturing methods, Superior Walls foundations can be built year-round, in virtually any weather.

And due to the speed and precision of installation on site – typically in less than a day – we're renowned throughout the industry as "The Smart Foundation Solution."

Your basement forms the foundation of everything you're designing into your new custom home. Enjoy all the advantages of America's leading foundation system – only when you build with Superior Walls.

Superior Features

uperior Walls offers a range of precast concrete wall products to suit your building or design situation. The Superior Walls system begins with the dream of building a superior new custom home. With flexibility to conform to nearly any architectural style, the design of your new home is limited only by your imagination.

The Superior Walls system supports a variety of wall heights and openings for custom doors and windows.

Superior Walls products are created in factory forms to ensure consistency. Trained manufacturing crews create your custom panels using only the highest quality materials. High-strength, steel and fiber

reinforced 5,000+ psi concrete is carefully mixed, formed to your exacting specifications, and is moisture resistant.

For more Superior Features visit: www.SuperiorWalls.com

Superior Home Plans www.SuperiorWalls.com

Superior Benefits

uperior Walls feature a continuous layer of insulation bonded directly to the concrete, for high energy efficiency. Certified trained crews install our superior systems typically in less than one day, in virtually any weather, saving valuable time. Our foundations can be

customized to nearly any architectural style, providing you with a maximum of home design flexibility.

Smart homeowners demand the Superior Walls advantage. Superior Walls foundations are custom-designed and

built to demanding specifications to be dry, warm and smart. Superior in every way. Because, when your new home is built with Superior Walls products, you can enjoy increased building efficiencies with your assurance of superior living.

Stronger. Warmer. Drier. Greener Smarter. Simply Superior!

Connect with Superior Walls® Join the conversation online!

DONALD A. GARDNER ARCHITECTS, INC.

Effortless Charm

ouble columns and a metal roof highlight this Craftsman cottage's charming front porch while the front-entry garage grants convenience for narrow lots.

Inside, a cathedral ceiling with vaulted clerestory window draws the eye upward and brings plenty of natural light into the great room. Entertaining is easy in this floor plan as the kitchen spills into the dining room. With a bay window, buffet niche and ceiling treatment, this room is perfect for formal meals. An expansive serving counter faces the great room and provides

KEEP IN MIND »

CONVERSATION FLOW...

AN OPEN KITCHEN CONNECTS THE LIVING SPACES FOR EASY ENTERTAINING.

extra storage and workspace, as well as casual seating that brings the conversation to the chef.

When nature allows, the rear porch is an optimal outdoor entertaining space and

can be completely opened up to the great room.

A tray ceiling crowns the master bedroom. With his-and-hers walk-in closets, twin vanities and a soaking tub and corner shower, the master suite is truly relaxing. Two additional bedrooms feature double closets, and one is topped with a cathedral ceiling.

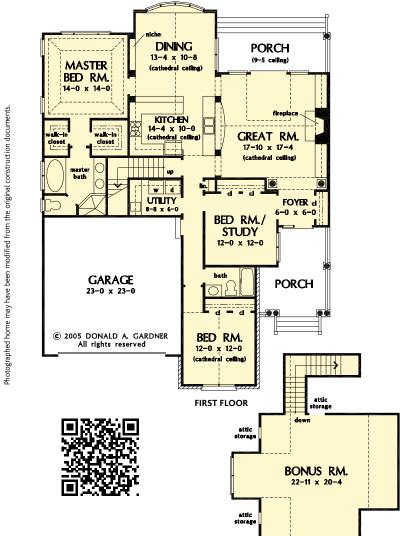

ABOVE: Recessed shelving frames the fireplace, and a wall of windows welcomes rear views.

LEFT: Dual vanities in the master bathroom make way for extra storage and elbow room.

Conceptual Design #1370 draws inspiration from a popular ranch plan, the Travis #1350, with its relaxed exterior and family-friendly layout. The living areas are completely open and lined with windows. The kitchen is steps away from the dining room and has a prep island, counter seating and walk-in pantry. Living extends outdoors with a covered porch and a screen porch with skylights and fireplace. The bedroom/study is topped with a coffered ceiling and two additional bedrooms share a Jack & Jill bathroom with a nearby e-space. The master suite features huge walk-in closets with pocket doors, a large bathroom with separate vanities, and a sitting room. This design is ideal for corner lots with its side-entry garage and covered side porch leading to the utility and mud rooms, where builtins keep clutter away from the living spaces.

PLAN NUMBER

Because you are placing your order directly with the designer, your plans can be shipped to you quickly. If your order is placed before noon ET, your plans will typically ship the same business day. Some restrictions may apply. Plans cannot be shipped to a post office box; please provide a physical street address.

(Tax will be determined upon placing order)

EXCHANGE POLICY

Since the designers' blueprints are printed especially for you at the time you place your order, returns are not acceptable. If, for some reason, you find that the plan that you purchased does not meet your needs, then you may exchange that plan for another plan in the same designer's collection. The designers allow you 60 days from the time of purchase to make an exchange. At the time of the exchange, you will be charged a processing fee of 20 percent of the total amount of the original order plus the difference in price between the plans (if applicable) and the cost to ship the new plans to you. Vellums, PDF's and CAD files cannot be exchanged. All sets must be approved and authorization given before the exchange can take place. Please call 1-888-870-1368 if you have any questions.

LOCAL BUILDING CODES AND ZONING REQUIREMENTS

The plans in this magazine are designed to meet or exceed national building standards. Because of the great differences in geography and climate, each state, county and municipality has its own building codes and zoning requirements. Your plan may need to be modified to comply with local requirements regarding snow loads, energy codes, soil and seismic conditions and a wide range of other matters. Prior to using your plans, the designers strongly advise that you consult a local building official.

ARCHITECTURE AND ENGINEERING SEALS

Some cities and states are now requiring that a licensed architect or engineer review and approve any set of building documents prior to construction. This is due to concern over energy costs, safety, structural integrity and other factors. Prior to applying for a building permit or the start of actual construction, the designers strongly advise that you consult your local building official who can tell you if such a review is required.

DISCLAIMER

Each designer has put substantial care and effort into the creation of these plans. The designers authorize the use of their plans on the express condition that you strictly comply with all local building codes, zoning requirements and other applicable laws, regulations and ordinances. However, because the designers cannot provide on-site consultation, supervision or control over actual construction, and because of the great variance in local building requirements, building practices and soil, seismic, weather and other conditions, THE DESIGNERS CANNOT MAKE ANY WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE CONTENT OR USE OF THEIR PRINTS OR VELLUMS, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE.

IGNORING COPYRIGHT LAWS

CAN BE A \$1,000,000 Mistake!

Recent changes in the US copyright laws allow for statutory penalties of up to \$150,000 per incident for copyright infringement involving any of the copyrighted plans found in this publication. The law can be confusing. So, for your own protection, take the time to understand what you cannot do when it comes to home plans.

What You Can't Do!

- You cannot duplicate home plans without a release.
- You cannot copy any part of a home plan to create another.
- You cannot build a home without buying a plan with license. Study sets do not include licenses.

WHAT IS IN A PLAN SET?

EACH SET OF DESIGNER PLANS IS A COLLECTION OF DRAWINGS (INCLUDING COMPONENTS SUCH AS FLOOR PLANS, DIMENSIONS, CROSS SECTIONS AND ELEVATIONS) THAT SHOW YOU EXACTLY HOW YOUR HOUSE IS TO BE BUILT. EACH DESIGNER HAS HIS OWN INDIVIDUAL PLAN PACKAGE THAT MAY INCLUDE:

1. COVER SHEET

An artist's rendering of the exterior of the house shows you approximately how the house will look when built and landscaped.

2. FOUNDATION PLAN

This plan gives the foundation layout, including support walls, excavated and unexcavated areas, if any, foundation notes and details.

3. DETAILED FLOOR PLANS

These plans show the layout of each floor of the house. Rooms and interior spaces are carefully dimensioned and keys are given for crosssection details provided later in the plans, as well as window and door size callouts. These plans may also show the location of kitchen appliances and bathroom fixtures, and may suggest locations for electrical fixtures, switches and outlets.

4. INTERIOR ELEVATIONS

These drawings show the specific details and design of cabinets, utility rooms, fireplaces, bookcases, built-in units and other special interior features depending on the nature and complexity of the item.

5. ROOF PLAN

The roof plan shows the overall layout and necessary details for roof construction. If trusses are used, it's suggested that you use a local truss manufacturer to design your trusses to comply with your local codes and regulations.

6. EXTERIOR ELEVATIONS

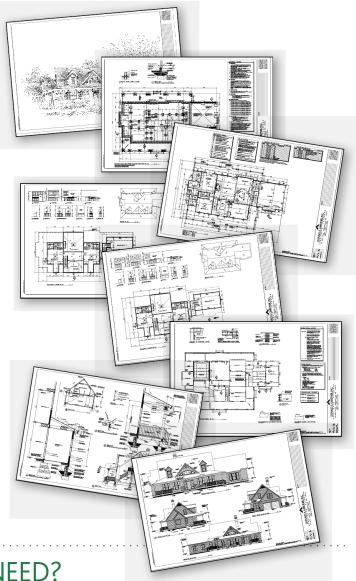

Included are front, rear, left and right sides of the house. Exterior materials, details and measurements are also given. This sheet also shows details of the house from the roof to the foundation. This section specifies the home's construction, insulation, flooring and roofing details.

7. CROSS-SECTION DETAILS

Important changes in floor, ceiling and roof heights or the relationship of one level to another are called out. Also shown, when applicable, are exterior details such as railing and banding.

8. STRUCTURAL PLAN

Overall layout and necessary details for the ceiling, second-floor framing (if applicable) and roof construction.

HOW MANY SETS DO YOU NEED?

OWNER (one set for notes, one for file)

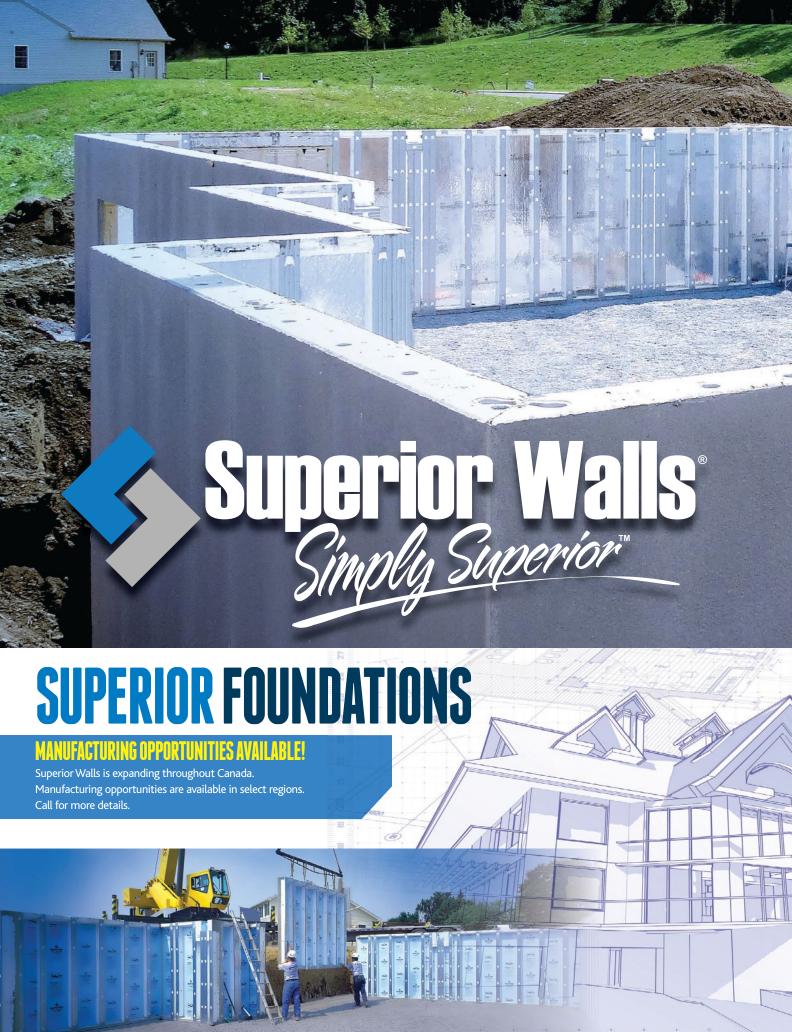

BUILDER (generally requires at least three sets; one as a legal document, one for inspections and at least one to give subcontractors)

LOCAL BUILDING DEPARTMENT (often requires two sets)

MORTGAGE LENDER (usually one set for a conventional loan; three sets for FHA or VA loans)

TOTAL NUMBER OF SETS

The designers offer a single set of prints so that you can study and plan your dream home in detail. However, you cannot build from this package. Single sets are marked "NOT FOR CONSTRUCTION." If you are planning to get estimates from multiple contractors or subcontractors, or if you are planning to build immediately, you will need more sets. Because additional sets are less expensive, make sure you order enough to satisfy all your requirements. Sometimes changes are needed to a plan; in that case we offer vellums that are reproducible and erasable so changes can be made directly to the plans. Vellums, PDF and CAD files are the only sets that can be reproduced; it is illegal to copy blueprints. The checklist on the left will help determine how many sets you will need.

SUPERIOR ADVANTAGE

The Leader In Residential Precast Concrete Foundations

Today's finest homes are being built on Superior foundations. Maybe it's because Superior Walls is the leader in residential precast foundation systems. Maybe it's because our high-strength concrete walls are created in a factory controlled environment with built-in insulation.

Or maybe architects and builders just like warm, dry basements and added living space for their home buyers. Whatever the reason, more new homes are resting on Superior Walls foundations. Maybe it's time you found out why.
